Profile

I am a motivated IT specialist with exceptional technical, analytical, and communication skills. My technical troubleshooting skills have consistently been acknowledged for their ability to quickly and efficiently analyze and resolve technical issues. I am committed to active learning and strive to expand my knowledge of the IT industry every day through professional work experience, online training platforms, projects, and virtual machine learning.

In addition to my technical abilities, I am adept at building relationships, creating consensus, and fostering a shared sense of purpose with my colleagues. As an energetic self-starter, problem solver, and team player, I am always eager to collaborate with others to achieve our common goals.

Education

Bachelor of Engineering, *Federal University of Technology, Akure* 

Diploma in Cloud Engineering, *AltSchool Africa* 

Skills and Tools

IT Troubleshooting	● ● ● ● ●	Python programming language	● ● ● ● ●
Terraform for resource provisioning	● ● ● ● ●	Kubernetes	● ● ● ● ●
Docker Containers	● ● ● ● ●	Databases	● ● ● ● ●
AWS cloud provider resources	● ● ● ● ●	Version Control with Git	● ● ● ● ●
Bash Scripting	● ● ● ● ●	Configuration management with Ansible	● ● ● ● ●

Projects and Labs

Deploying a full-stack application on Ubuntu

Deploying a Flask App on Ubuntu 22.04 LTS in an Amazon EC2 instance using Visual Studio Code terminal as my preferred command-line interface. I have provided step by step documentation on the project in the GitHub Repo with its link below;

<https://github.com/LUFA199x/Online-Business-Registration-> 

Containerization of a React front-end and Flask back-end application

Using docker containers to containerize a web application and taking advantage of its deployment, scalability and reusability properties.
